

Chess for Kids!!!

“Never Played? That's OK!”

Cloud City Youth

Presents:
An 8 Week Session!

The Benefits

Learning chess improves memory, focus, and retention. It accelerates mental processing. It develops logic, reasoning, and decision making skills. It fosters imagination and creativity. Studies support learning chess leads to improved IQ, and raising grades and test scores. It certainly builds the brain, but it does much more...

It is inclusive, it is global, and it is social.

It brings people together! It instills confidence!

<i>We use the creative play method of instruction!</i>
